EDUCATION

B.Sc. Information Technology (B.Sc. IT)

Expected Graduation: 2028

Vivekanand Education Society's College of Arts, Science & Commerce (VES), Mumbai | Second Year (SYIT)

HSC — VES, Mumbai: 74.6%

SSC — VES, Mumbai: 80.80%

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, JavaScript, SQL, Shell Scripting (Bash)

Web Development: HTML5, CSS3, JavaScript, PHP

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Linux CLI

Core Subjects: Data Structures, DBMS, Operating Systems, OOP

PROJECTS

Restaurant Management Website

2024

PHP | HTML5 | CSS3 | JavaScript

- Engineered a full-stack, mobile-responsive restaurant website with PHP backend handling dynamic content rendering and user form submissions.
- Implemented session management, cookie handling, and PHP superglobals to support stateful user interactions across multiple pages.
- Designed a clean, device-adaptive frontend using HTML5 and CSS3, improving usability and cross-browser compatibility.

Student-Teacher Management System

2024 | Team Project

Shell Scripting (Bash) | Linux

- Architected a CLI-based record management system using Bash scripting to automate CRUD operations for student and teacher data.
- Reduced manual administrative overhead by scripting repetitive file operations including search, insert, update, and delete workflows.
- Collaborated in a team of peers, coordinating modular script design and feature integration through structured task delegation.

Snake Game

2023

Python

- Developed a fully playable Snake Game with real-time keyboard input, dynamic score tracking, and collision detection logic.
- Applied object-oriented programming principles and iterative debugging to deliver a stable, responsive gameplay experience.

ACHIEVEMENTS

- Independently conceptualized, developed, and deployed three end-to-end software projects spanning web development, systems programming, and application development — demonstrating practical versatility across multiple technology stacks.
- Exhibited strong adaptability by acquiring proficiency in Python, PHP, Bash, C++, and JavaScript concurrently with academic coursework, applying each language in distinct, functional project contexts.
- Maintains a well-documented public GitHub portfolio with version-controlled repositories, reflecting consistent coding activity and a disciplined approach to tracking and sharing technical progress.
- Proactively pursues continuous skill development in emerging technologies including Flutter and MongoDB, extending capabilities beyond the core academic curriculum.

CONTINUOUS LEARNING

- Java Programming — Self-directed study covering OOP, collections, and exception handling
- Flutter Development — Building cross-platform mobile UI components using Dart and Flutter SDK
- MongoDB Fundamentals — Learning document-oriented database design and NoSQL query principles
